ABOUT AGROMAP ?

AGROMAP is a company specialized in the development of forest restoration projects, biodiversity conservation, and the improvement of producers' incomes. We use Nature-Based Solutions (NBS) approaches to address the impacts of climate change through agroforestry, reforestation, and mangrove restoration projects carried out with communities and smallholder producers.

OUR VISION

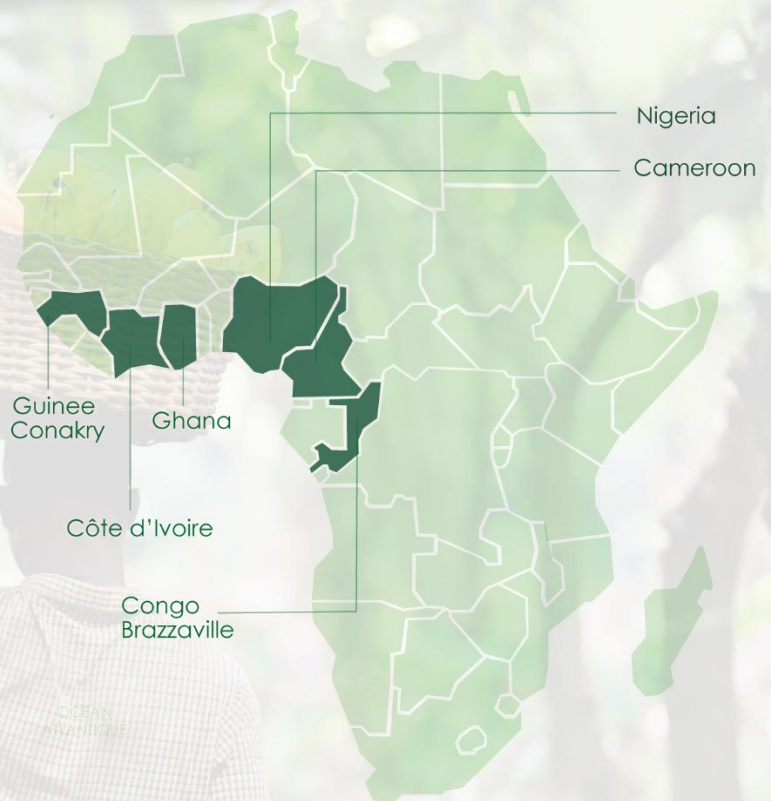

We develop nature-based ecosystem services to support more sustainable economic development.

OUR MISSION

We work with local communities to restore forest landscapes on a large scale, thereby creating jobs, protecting ecosystems and biodiversity, and promoting sustainable agriculture.

OUR VALUES

Commitment - Integrity - Innovation
Excellence - Proactivity

REHABILITATE - RESTORE - PRESERVE

CÔTE D'IVOIRE - CONGO - CAMEROON - GHANA - GUINEA CONAKRY - NIGERIA

SUBSIDIARIES

AGROMAP
NATURE BASED SOLUTIONS

EXPERTISES

- Insetting, offsetting, and carbon compensation initiatives
- Agroforestry/Reforestation
- Mangrove restoration
- Production of forest and fruit seedlings
- Awareness raising and training
- Good Agricultural Practices (GAP)
- Rehabilitation of cocoa plots
- Community development
- Participatory diagnosis and mapping
- Integrated control of CSSV

AGROMAP
CONSULTING

EXPERTISES

- ESG strategy consulting & compliance with international standards;
- Responsible supply chains and due diligence
- Environmental and climate risk analysis
- Pre-feasibility and feasibility studies
- Environmental and social assessments
- Carbon project design documents (PDDs)
- Monitoring and evaluation of environmental projects and programs
- Capacity building and training

AGROMAP
TECHNOLOGY

EXPERTISES

- Digital traceability solutions
- EUDR and ARS 1000 compliance
- Digitization of forestry and agricultural management systems
- Spatial analysis via GIS and remote sensing
- Satellite image analysis and processing
- Diagnostics & aerial mapping using drones/Lidar
- Training (remote sensing, GIS, etc.)

AGROMAP
RENEWABLE ENERGIES

EXPERTISES

- Support for energy transition
- Energy and environmental diagnostics for businesses
- Implementation of energy efficiency plans
- Support for sustainable wood energy management
- Management and recovery of forestry and agricultural residues
- Circular economy in agricultural and forestry operations
- Training and support
